## FLOWER AND VEGETABLE SEED NOVELTIES OF MERIT FOR 1945

### Petunia

#### Hybrida Nana Compacta Cheerful

Bronze Medal Award in the 1944 All-America Trials, Cheerful is the clear, light pink, free-flowering Petunia for 1944. Deeper in color than First Lady and with a slight suffusion of salmon it attracts immediate attention. Compact growing suitable for bedding, window boxes, as well as for pots. Plants first grow low spreading close to the ground, later forming a mound 10 to 12 inches high with a spread of 2 feet. The plants are literally covered with blooms measuring up to 2½ inches in diameter.

Trade Pkt...\$0.75    ⅛ oz...\$2.00    ¼ oz...\$3.00    ½ oz...\$5.00

### Petunia

#### Alldouble America

Silver Medal Winner in the 1943 All-American Selections. Alldouble America is of the Hybrida Nana Carnation flowered type. Blooms are of medium size and are borne in great abundance from early summer until frost. Color is a mauve-pink, making Alldouble America ideal for bedding as well as cutting.

This is the first all double Petunia produced in America and by an American firm.

½ Trade Pkt. (500 Seeds)...\$1.25    Trade Pkt. (1000 Seeds)...\$2.00

### Marigold

#### Flash

See Illustration

Earliest of all Marigolds, blooms in 8 weeks from seed, continues profusely all summer and fall. Colors range from vivid red through bronze and tangerine with a few yellows. Most uniform in plant habit. A French Hybrid, with flowers 1¾ in. and more across. Plants grow 18 in. tall. Nationally advertised, several pages in full color. Ample stocks to fill all your orders. Specially priced to pay you an unusually fine profit.

Trade Pkt...\$0.35    ¼ oz...\$0.75    ½ oz...\$1.50    Oz...\$2.50

### Marigold

#### Mammoth Mum

Mammoth Mum is well named, the largest incurved Chrysanthemum—flowered Marigold and a close rival to the large type Chrysanthemum. Bushy, strong erect plants which reach a height of three feet by August, when long-stemmed flowers appear to almost amaze one with their size which is 4 to 5 inches across and 2 inches deep. Its color is a rich lemon-yellow. Flowering from August until freezing weather sets in they make a colorful show in the garden and give long lasting cut flowers. The foliage is a rich, dark green and quite ornamental. Highly recommended.

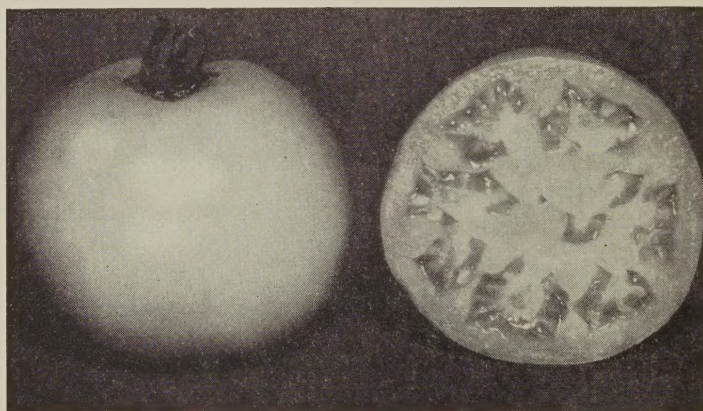

Trade Pkt.....\$0.35    ¼ oz.....\$0.80    Oz.....\$2.75

### Marigold

#### Dwarf French Harmony Sunkist

Silver medal winner in the 1943 All-America Selections Sunkist is a sport from Butterball (winner in the 1942 trials). Color is a deep golden orange. Flowers are large (2 inches) with crested centers. Sunkist is early and very free blooming, and is especially recommended for the border, window box or pot.

Trade Pkt.....\$0.25    ¼ oz.....\$0.40    Oz.....\$1.25

### TOMATO JUBILEE

#### Tomato Jubilee

Bronze Medal Winner, All-American Selections of 1943

See Illustration

A new orange-yellow tomato which compares favorably with the best of the standard red varieties in shape, smoothness, quality and solidity.

Jubilee is entirely different from any yellow or orange tomato ever grown. Fruits are bright orange-yellow, globular, weigh about 6 ozs., smooth, and quite free from cracking. The interior is modern, thick-walled, with few seeds. The flavor is somewhat mild but not flat. Makes delicious juice of unusual and attractive color. Fruits of Jubilee are usually ready in about 72 days after plants are set out in the garden.

The plants are short-stemmed, but not determinate, stiff, compact, and cover the fruit well. They also hold their foliage well and bear over a long season. The fruit color develops evenly and uniformly.

½ oz.....\$0.60    Oz.....\$1.00    ¼ lb.....\$3.00

### Wilt Resistant Aster Strains

These strains have been developed to resist the attacks of the wilt fungus, which has for the past few years caused so much loss to growers.

#### Early Giant

(See Illustration)

Flowers are very large and full with broad, graceful petals. The plants are only 1½ to 2 feet tall and branching low on the central spike. Light Blue, clear rich light blue.

Peachblossom. Early bloomer.

Rose Marie. Rich Rose. Early bloomer.

### Wilt Resistant Asters—Continued

#### Princess Type

This new type Aster provides a needed, new form for the cut flower grower. The blooms have a full crested center surrounded by several rows of strong guard petals. They are fine keepers and good shippers. Plants in the field are from 18 to 24 inches in height, but of course, when grown under some shade would double their height.

Princess Anne—Peachblossom.

Princess Bonnie—Soft salmon rose.

Princess Marsha—Cinabar scarlet.

## Kalanchoe "Tom Thumb"

The plant's dwarf, compact habit, free flowering and keeping qualities make it most desirable for dish gardens, terrariums and novelty pots or filling in where a dwarf plant is desirable, the height over all being but 5 or 6 inches. Has bright scarlet clusters of bloom borne on short stems just above the foliage; leaves are small, being placed one on top of the other on closely jointed stems. Whether in flower or not the plant compares favorably with other succulents as a filler and it can be flowered early by the use of black cloth treatment:

## Petunias

### Giants of California

#### Supreme Florist Strain

For some years there has been a demand for this type of Petunia in a color range comprising the lighter rose and pink shades, and we feel that it will be a welcome addition to the large Florist type. It is of the well known Giants of California type, with very large ruffled, shallow, open throated flowers, freely produced on strong growing plants which may be as much as two feet tall by the end of the season. It is an excellent bedding variety as well as a fine window box type.

Trade pkt.....\$0.75    1/64 oz.....\$1.50    1/32 oz.....\$2.75

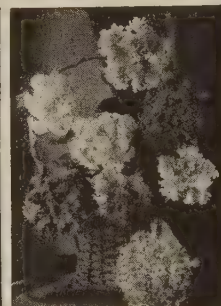

### Glamour

A luscious shade of salmon rose, delicately veined brown in the creamy open shallow throat. The blooms are extremely large, 5 to 6 inches in diameter, with a shallow open throat surrounded by satiny petals which are heavily ruffled. The huge strikingly beautiful flowers are freely produced on strong growing richly foliaged plants which will be 1 1/2 ft. to 2 ft. tall by the end of the season, although the first flowers are produced when the plants are only 5 inches to 6 inches tall.
